Summary

Results-driven Software Engineer and Associate Project Manager with expertise in delivering complex, high-impact projects on time. Skilled at leading cross-functional teams, translating technical requirements into actionable roadmaps, and maintaining clear alignment with stakeholder. A disciplined Agile practitioner across the full sprint lifecycle from planning and backlog grooming to risk mitigation and retrospectives. Brings hands-on experience in test automation (Cypress, Selenium, Playwright) and MERN Stack development, building scalable, production-ready applications from the ground up.

Professional Experience

RapidLabs.ai

Associate Project Manager

Feb 2026 – Present

Islamabad, Pakistan

- Orchestrating multiple engineering workstreams, ensuring alignment with product goals and timely delivery.
- Driving cross-team coordination to reduce bottlenecks across development, QA, and design.
- Identifying risks and dependencies early and implementing mitigation strategies to avoid delays.
- Facilitating Agile ceremonies and maintaining a prioritized backlog aligned with stakeholder needs.
- Delivering KPI dashboards and progress reports to enable data-driven decision-making.

Techfy (Remote)

SQA Automation Engineer

Feb 2026 – Apr 2026

London, UK

- Developed and maintained an e2e Playwright(TypeScript) automation suite for Click2Deploy platform.
- Automated key workflows including authentication, deployment, backup, and restore.
- Designed reusable page objects and utilities for scalable and maintainable test architecture.
- Implemented custom reporting to enhance test visibility and stakeholder insights.
- Improved regression stability and reduced manual QA effort through reliable automation.

Easykaam

Software Quality Assurance Intern

Oct 2025 – Dec 2025

Islamabad, Pakistan

- Conducted structured manual testing on a live mobile application, validating fr's and identifying usability issues before release.
- Designed, documented, and executed 30+ test cases covering critical user flows, improving release quality and defect containment.
- Collaborated with developers to reproduce, triage, and verify fixes, accelerating resolution and enhancing system stability.

Education

Bachelor of Science in Software Engineering
COMSATS University Islamabad — Islamabad, Pakistan

Sep 2021 – Jan 2026

Skills

Agile / Scrum Jira Trello ClickUp Risk Management KPI Reporting Sprint Planning
Stakeholder Management Cypress Selenium Playwright Manual Testing Test Automation Postman
API Testing JavaScript React Node.js Express.js MongoDB HTML5 CSS3 RESTful APIs
Python Cross-Browser Testing

Projects

HarfZaar - FYP (2nd Position)

 [GitHub](#)

A full-stack MERN web application developed for Urdu poetry enthusiasts, enabling poetry submission, discovery, and community engagement at large scale. Engineered an AI-powered multimodal search engine supporting text, voice, and image-based queries, significantly improving content discoverability. Integrated gamified engagement modules and real-time interaction features to drive user retention and foster an active creator community. Built using **React**, **Node.js**, **Express**, **TensorFlow**, **JavaScript**, **Python**.

Darussalam Website - Automation Testing

 [GitHub](#)

Architected a comprehensive automation testing framework, covering critical end-to-end user flows including authentication, product search, cart management, and checkout. Implemented reusable custom commands, API response mocking, and cross-browser test execution to ensure consistent system reliability. Reduced manual regression effort and increased defect detection coverage across multiple environments. Built using **Cypress**, **Selenium**.

Travel Website - Responsive Frontend Designing

 [GitHub](#)

Designed a fully responsive travel website with features including ticket booking, services, and a contact section. Implemented dynamic UI components including interactive destination cards, smooth scroll navigation, and an optimized mobile layout, delivering a seamless experience across desktop, tablet, and mobile devices. Built using **HTML**, **CSS**, **JavaScript**, **Bootstrap**.
